

Oak Cliff Bible Fellowship

Energy Market Intelligence (EMI)

Generations past and present have experienced the power of life-changing discipleship through worship, fellowship, Christin education, and outreach under the faithful and effective leadership of Senior Pastor and First Lady, Drs. Tony and Lois Evans. With God's grace, Oak Cliff Bible Fellowship (OCBF) continues to make Kingdom disciples that spread the good news of Jesus Christ while helping other believers become disciples and walk in their divine authority, enabling them to demolish destructive forces that operate in people's lives.

Long term client, Oak Cliff Bible Fellowship relies solely on Onyx to manage its energy budget. Through Onyx Energy Market intelligence (EMI), OCBF capitalized on ideal market trading to reduce cost. This resulted in financial gains for OCBF to help further ministry and outreach efforts for generations to come.

Since 2009, Onyx Power & Gas Consulting has provided electricity and natural gas consulting services to commercial and industrial consumers. Our robust wholesale trading network and operations allows us to leverage purchasing power. The end result is the most aggressive pricing in the marketplace for maximum savings to our clients.
