

Ohio Rural Water Association

Energy Procurement, Energy Market Intelligence (EMI), Demand Response

Since 1976, the Ohio Rural Water Association (ORWA) has been providing free on-site technical assistance to Ohio's rural communities with water and wastewater systems. The ORWA continues to work towards the expansion of benefits and services provided to its members. Combined, the ORWA system members provide water and/or wastewater services to over two million Ohioans.

Since 2013, Onyx has managed energy budgets for a large number of ORWA members. Onyx services to ORWA include Electricity & Natural Gas Procurement, Energy Market Intelligence, Demand Response, and more. Onyx has procured over 250,000 MWhs of electricity for ORWA and its members with over \$2.5 million in savings. In 2019, the ORWA named Onyx its preferred Energy Consulting Firm.

Since 2009, Onyx Power & Gas Consulting has provided electricity and natural gas consulting services to commercial and industrial consumers. Our robust wholesale trading network and operations allows us to leverage purchasing power. The end result is the most aggressive pricing in the marketplace for maximum savings to our clients.
